EDUCATION

University of Petroleum & Energy Studies | *B.Tech CSE (DevOps)*

2023 - 2027 | CGPA: 7.9

Sunbeam English School, Bhagwanpur | *XII, Science*

2020 - 2022 | 84.3%

TECHNICAL SKILLS

Languages & Frameworks: Java, Python, JavaScript, React.js, Tailwind CSS, Node.js, Express.js, REST APIs, PostgreSQL, Redis, SQLite

Generative AI: LangChain, LangGraph, ChromaDB, Sentence Transformers, Chainlit

DevOps & Cloud: Docker, Kubernetes (HPA, K3s, OKE), Terraform, Kustomize, ArgoCD, AWS (EC2, RDS, Lambda, SNS, EIP, VPC), OCI (Compute, OKE), GitHub Actions, Jenkins

Observability & Security: Prometheus, Grafana, Nginx, Caddy, HashiCorp Vault, SonarQube, Trivy, Cosign, Syft (SBOM), JWT, Helmet

Concepts: CI/CD, GitOps, Infrastructure-as-Code, Microservices, Observability

PROFESSIONAL EXPERIENCE

Sunrays Logistics, Mumbai | *Web Development Intern*

Jun 2025 – Jul 2025

- Integrated a WhatsApp click-to-chat button via the wa.me API, pre-filled with the business contact so clients could start conversations without saving the number.
- Cut page load time by converting images to WebP and applying lazy loading, raising the Lighthouse score from approx 65 to 92+ and fixing mobile responsiveness.
- Structured shipment and client data into an Excel tracker with status dropdowns and conditional formatting, adopted for daily team coordination.

Xebia | *Frontend Developer Intern*

Jun 2026 – Jul 2026

- Built the Configuration module of a University Management System dashboard from scratch in React and Tailwind CSS, covering four sections: Configuration Dashboard, Academic Rules Form, Attendance Rules Form, and Feature Flags Page.
- Developed reusable UI components, including card-based navigation, feature-flag toggle switches (Library, Exam Portal, Fee Management), dropdowns, and validated form inputs, for a role-based admin settings interface.
- Integrated the module end-to-end with backend-provided REST APIs, handling data fetch, save, and reset flows with form validation and error states.

PROJECTS

InsightEngine AI-Multi-Agent RAG System | [GitHub](#) | [Live](#)

- Engineered a multi-agent RAG system in LangGraph with parallel agent fan-out, human-in-the-loop clarification, and 4-route query routing via Pydantic structured outputs.
- Designed a hybrid retrieval pipeline (ChromaDB dense search and BM25 with weighted fusion, cross-encoder reranking) plus a Corrective RAG loop with automatic query rewriting.
- Containerized with Docker and deployed on OCI with GitHub Actions CI/CD (pytest, Trivy, SSH deploy) behind a Caddy HTTPS reverse proxy.
- Implemented Adaptive Retrieval with per-query-type parameter tuning, persistent semantic user memory via a dedicated ChromaDB collection, and MultiHop Reasoning that decomposes complex questions into ordered, context-chained search steps.
- Built NL-to-SQL for structured budget queries, LLM-as-Judge hallucination scoring with SHA-256 response caching, token-by-token streaming, and peruser document isolation via ChromaDB metadata filtering.

Chaos Engineering + Multi-Region Disaster Recovery | [GitHub](#) | [Live](#)

- Provisioned active-passive multi-region AWS infrastructure via Terraform (VPC, EC2, EIP, RDS, IAM, SG) across us-east-1 and us-west-2 with zero manual console steps.
- Deployed a Cloudflare Worker edge proxy for zero-TTL failover, rerouting to the DR region in under 5 seconds and removing DNS-propagation delay.
- Validated resilience with 4 chaos experiments: RTO under 5s, P99 latency 92ms, 99.9% availability; ran K3s with HPA dual-metric autoscaling.

Gnosis Full-Stack Microservices Platform with DevOps & AIOps | [GitHub](#) | [Live](#)

- Architected a 7-service microservices platform with JWT and Helmet CSP, an 8+ table PostgreSQL schema, and Redis-backed battle rooms and leaderboards.
- Developed a real-time multiplayer quiz engine with Socket.io for 1v1 and group sessions up to 10 players; React SPA served via Nginx on Oracle Cloud.
- Shipped a 9-stage GitHub Actions CI/CD pipeline (multi-arch Docker, Trivy, Cosign, Syft SBOM, ArgoCD GitOps to OKE) with HPA, Prometheus and Grafana.
- Built Kira AIOps agent (Python + Streamlit + Gemini 2.5-flash) for automated K8s cluster health scanning, anomaly detection & natural-language incident summaries.

ACHIEVEMENTS & CERTIFICATIONS

-
- AWS Certified Cloud Practitioner
 - **Winner**, Intra-Department Badminton Tournament, UPES
